

# Report Review

We help companies elevate their sustainability reporting and meet the needs of key stakeholders by providing a comprehensive assessment of sustainability reporting efforts.

We develop a set of concise recommendations to help you deliver best-in-class sustainability reporting using our methodology, which is informed by more than 30 years of thought leadership on sustainability reporting and transparency, as well as best practices and the latest trends and standards in reporting.

---

## Why is sustainability reporting important?

- ▶ Sustainability reporting is a critical communications tool that helps your stakeholders — investors, raters and rankers, employees, and customers, among others — understand your strategy, position, and performance on sustainability topics.
- ▶ Transparency and disclosure about sustainability topics builds credibility, informs decision-making, drives change, fosters improved performance and enables companies to create a sustainable future.

---

## What are the benefits?

We will identify opportunities that will help you create a sustainability report that:

- ▶ Meets the needs of your stakeholders, giving them the information they need in the format they expect.
- ▶ Provides the appropriate level of detail and context about your priority sustainability topics.
- ▶ Incorporates high-level guidance from leading frameworks including GRI, SASB, TCFD and integrated reporting.
- ▶ Delivers best-in-class transparency and disclosure.

## Our approach

SustainAbility's report review identifies areas of strength and opportunities for improvement across 10 attributes, listed below, that we consider best practice based on current leading frameworks, trends and our 30 years of thought leadership and experience.

- Business profile
- Vision
- Priority issues
- Data
- Engagement
- Context
- Governance
- Transparency
- Accessibility
- Integration

We provide you with an assessment of each attribute along with a set of concise recommendations for each to help you make specific adjustments and more effectively communicate to your stakeholders through your sustainability reporting.

## Our experience

### **Making the future the cause of our present.**

We inspire and enable businesses like yours to lead the transition to a more sustainable economy.

Since 1987, we have worked tirelessly to catalyze innovation and provide solutions to make businesses and markets more sustainable. We are at the forefront of the sustainability agenda.

Our knowledge is extensive — we know what works and what doesn't for hundreds of other organizations. We are uniquely positioned to advise clients on how to collaborate in ways that give your business the greatest potential to deliver change on a huge scale.

### **Are you ready?**

Effective reporting will enable your company to successfully communicate the ways in which you're building a sustainable future.
